

As an electronic engineer majored in communications for 40 years and aa a licensed amateur radio operator (K4LV - Extra Class) since 1957, I would like go on record as being totally opposed to Broadband Over Power Lines (BPL). Not only would BPL cause interference to the Amateur Radio Service (ARS), hams would also interfere with BPL! This is a 'LOSE-LOSE' situation if I ever saw one and I hope good judgement prevails by the FCC not approving Docket - 03-104.
